

1st IUA Endovascular Course for Young Vascular Specialists

May 23-27, 2018

Beijing, China

www.angiology.org

- Endovascular Live case demonstrations
- Mainly focus on ASO, from carotid, visceral, aortoiliac, femoropopliteal, BTK to

Contact: organizing secretariat: Ms. Li Zhao(lizhaoxw@sina.com)

Purpose of this course

Endovascular therapy, as a promising minimally invasive technique, has been becoming more and more important, and for most peripheral vascular diseases(PVD), the first-line treatment strategy nowadays.

PVD covers a large range of vascular disease, and in this field a lot new devices and new techniques has emerged, so it is very difficult for the young vascular specialist to keep up with the progress.

We aim to illuminate the detailed techniques of endovascular therapy nowadays to the young vascular specialists who have been known some basic rules and want to get to a higher skilled level. And because the time is a little limited, we will focus on a relatively small field at one time that will have more discussion and deepen the knowledge communication.

We hope this course can help the young guys with their daily endovascular practice, and deepen the international knowledge communication and friendship.

Intended participants and their background

Candidates must:

1. be under 35 (in exceptional cases 40) years of age
2. be vascular specialists (persons working within vascular centers who wish to deepen their theoretical and especially practical skills in endovascular management of vascular disease; Practicing clinicians working in the vascular field who are interested in endovascular intervention;)
3. be fluent in English
4. be able to cover travel expenses (all on-site expenses will be covered by the organizers).

The International Union of Angiology and the organizing committee welcomes applications from anyone matching the criteria listed above. We would like to offer each chapter of IUA 3-4 candidates and totally about 30 successful candidates will be selected by the course organizers. All on-site expenses (registration, accommodation and board) for all selected participants will be covered by the organizers. The application must be submitted by March 30, 2018.

More detailed rules for inclusion, preliminary program, and other useful information will be available at www.iua-course.org

If you have any questions concerning the course or any other IUA issues, please do not hesitate to contact us.

Lianrui Guo(lianruiguo@sina.com) and Li Zhao(lizhaoxw@sina.com)

Preliminary Program

May-24,2018

8:00-8:30 Opening ceremony

8:30-10:30 Perioperative and long-term medical treatment

10:30-12:30 microcirculation of ischemic foot

12:30-13:30 Lunch

14:00-16:00 supra-aortic arterial occlusive disease session

16:00-18:00 Aortoiliac occlusive disease

May-25, 2018

8 : 00-12 : 00 Femoropopliteal occlusive disease

12:00-13:30 lunch

14:00-18:00 BTK arterial disease

May-26-27, 2018

Endovascular Live case demonstrations

Approximately 20 live cases, mainly focus on ASO, including: endovascular treatment of: carotid a , vertebral a , subclavian a, renal a, aortoiliac a, femoropopliteal a, BTK to BTA arteries. On site discussion with technical skills and key points.
